the better solution

MACHINES AND EQUIPMENT
FOR PLASTIC PROCESSING

Our electrically movable material block makes your shear roll even more economical

Currently the sheet on the front roll has to be manually cleaned, with unused material wasted at every stoppage or whenever materials are changed. With the electrically movable material block, the sheet is pushed in the direction of the granulation ring and therefore can still be granulated.

We offer this system for all BSW models. Retrofitting is also possible.

+ **Cost benefits**
thanks to
automatic cleaning

+ **More efficient,**
faster material
changes

Your benefits:

+ Time saving

Manual cleaning of the front roll during material changes or stoppages is no longer required.

+ Cost saving

Optimum material utilisation: the sheet continues to be used and granulated.

+ Easy to retrofit

on all BSW models

Electrically movable material block

BSW 100 lab shear roll

EVERYTHING FROM A SINGLE SOURCE

Thanks to our integration into the **PÜTZ GROUP** and the resulting **synergy effects**, we are able to offer you not just machines and systems for plastic processing, but also the appropriate test technology to test surfaces for dimensional accuracy.
