

Bellaform has been developing and building since 1957

## Machines and systems for plastics processing

### World market leading mono and multi-layer extrusion lines

- For pipes, profiles and hoses from Ø smallest to 50 mm
- For corrugated tubes up to Ø 58 mm

Our multi-layer systems are designed for production with a maximum of seven layers. **Tests with up to five layers can be carried out in our technical centre.**

In addition to complex systems including all peripheral devices, Bellaform also offers individual units: **all individual devices in our series, all components and all additional devices, such as vacuum tanks, cooling troughs, measuring systems, takeoffs, cutting devices, stacking and packaging equipment.**

### Shear roller mixing systems for feedstock preparation (MIM and CIM)

- Melting
  - Homogenizing
  - Dispersing
  - Compressing
  - Granulating
- of materials of medium to very high viscosity.

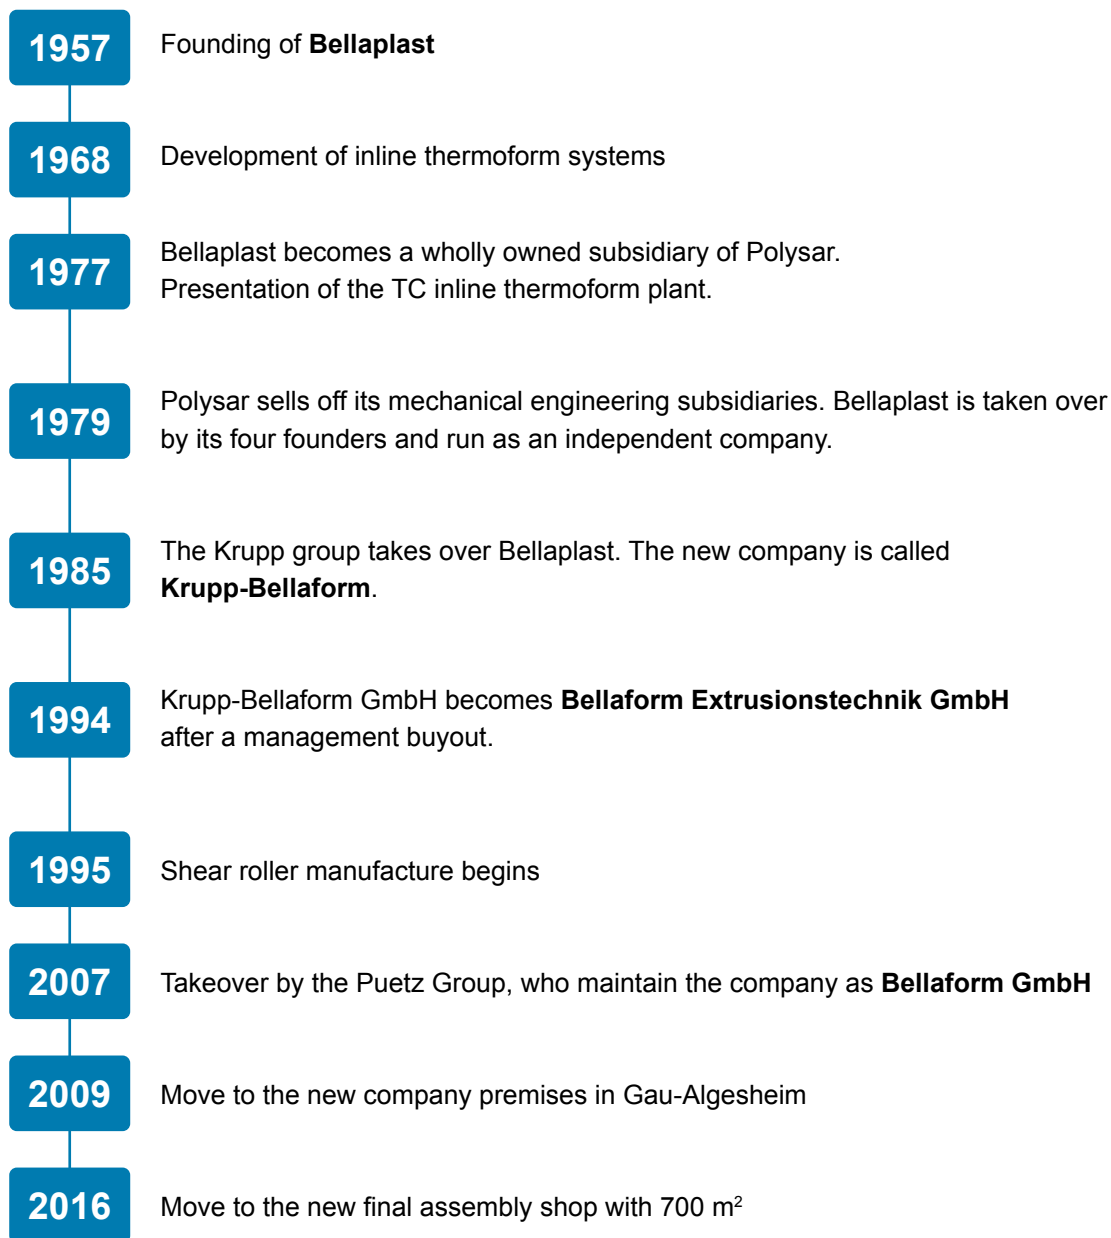

**Bellaform shear rollers are used in the following industries:**

Plastics processing, Ceramics, Powder metallurgy, Medical masses, Chemical Industry, Energetix

Bellaform has been a member of the Pütz Group since 2007.

## History

**Bellaform GmbH**
